School Tech Made Simple

With a **School-Approved Device Program,** your child gets the right device ready to learn, supported locally, and approved by your school.

What is a School-Approved Device Program?

With a school-approved device, your child gets the right device ready to learn, supported locally, and approved by your school. A **School-Approved Device Program** is a school-led program where families purchase from a pre-selected, book listed range of education-specific devices. These devices are pre-configured, supported, and aligned with your school's IT and curriculum needs.

Why Edunet?

Edunet have been providing education grade devices to schools and parents for over 20 years.

We are proud to be working with your school and for having the opportunity to make this process as simple and efficient as possible for you!

Why Schools Choose a School-Approved Device Program

- **Fair for Everyone** All students use the same high-quality devices, helping to create a level playing field in the classroom.
- **Less Stress, More Support** Edunet handles setup, repairs, and warranty claims — even during school holidays.
- **Flexible Payment Options** Spread the cost with interest-free plans and no upfront deposit.
- **Built for School Life** Tough, reliable devices with all-day battery life and education-specific features.
- **School-Approved** You choose from a list of devices your school recommends — so you know it's the right fit.

Education Devices vs. Retail Devices

Not all devices are built for learning. Education devices are designed for schools: they're durable, consistent, and easy to manage. They integrate seamlessly with school systems, include education warranties, and come with full Edunet service for imaging, delivery, and ongoing support. Retail devices are built for home use, often with mixed specs, limited IT manageability, and basic warranties, which can make setup and support a challenge for schools.

Helpful Advice

Can I pass this device on to a younger sibling?
Absolutely. Any warranty or insurance you've purchased stays with the device, no matter who's using it.

Backing up your data
If your device ever needs repairs under warranty or insurance, it may need to be wiped during the process. To avoid losing important files, it's a good idea to regularly back up your data.
Most schools provide students with access to free cloud storage, so saving to the cloud is simple and usually free.

Installing software
Your school will supply all the software needed for learning. If you'd like to install anything else—like a home printer or extra apps—it's best to check with the school first. Some schools manage admin rights on student devices to keep things secure, so they may need to help with installations.

Changing schools
If you're moving to a new school and want to remove the old school's software, speak with your new school first. They'll usually wipe the device and install their own setup. Edunet can help with resetting the device, but we can't install new school software like Microsoft Office or Adobe.

Finished school and want to use the device at home?
No problem. We can restore the device to its factory settings so it's like new again. You'll then be free to install any apps you like and use it as a personal device.

Need a Laptop Repair? We're Here to Help
Even During the Holidays

Warranty covers any faults caused by the manufacturer, things that aren't your child's fault. This includes issues like hardware failures or parts not working properly.

Insurance (also called Accidental Damage Protection or ADP) covers damage caused by accidents, like drops, knocks, or liquid spills.
